

# INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/07713

## A. CLASSIFICATION OF SUBJECT MATTER

IPC(7) : C12Q 1/68; G01N 33/53

US CL : 435/6, 7.1

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S. : 435/6, 7.1

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)  
Please See Continuation Sheet

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
Y	US 6,316,208 B1 (ROBERTS et al.) 13 November 2001 (13.11.2001), columns 18-20 and 43-47.	18-24,32,37,38

A	US 6,180,333 B1 (GIORDANO) 30 January 2001 (30.01.2001).	1-45
A	US 5,563,035 A (WEIGEL) 08 October 1996 (08.10.1996).	1-45

☐ Further documents are listed in the continuation of Box C.

☐ See patent family annex.

### \* Special categories of cited documents

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

### \*T

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

### \*X

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

### \*Y

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

### \*B

document member of the same patent family

Date of the actual completion of the international search

# INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/07713

**Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)**

This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claim Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
  
2. ☐ Claim Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
  
3. ☐ Claim Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

**Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)**This International Searching Authority found multiple inventions in this international application, as follows:  
Please See Continuation Sheet

1. ☒ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
  
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

The additional search fees were accompanied by the applicant's protest.

No protest accompanied the payment of additional search fees.

PCT/US03/07713

## BOX II. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be searched, the appropriate additional search fees must be paid.

Group I, claim(s) 1-17, drawn to a method for predicting clinical outcome for a patient diagnosed with cancer.

Group II, claim(s) 18-24, drawn to a method of predicting the likelihood of the recurrence of cancer following treatment in a cancer patient.

Group III, claim(s) 25-31, drawn to a method for classifying cancer.

Group IV, claim(s) 32-40, drawn to a method for predicting the likelihood of long-term survival of a breast cancer patient, and an array for use therein.

Group V, claim(s) 41 and 44, drawn to a method of predicting the likelihood of long-term survival of a patient diagnosed with invasive breast cancer, and an array for use therein.

Group VI, claim(s) 42, 43, and 45, drawn to a method of predicting the likelihood of long-term survival of a patient diagnosed with estrogen receptor-positive invasive breast cancer, and an array for use therein.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each of the groups corresponds to a specific relationship between a specific type of cancer and a specific set of genes; thus, there is clearly no special technical feature in common.

## Continuation of B. FIELDS SEARCHED Item 3:

USPAT, PGFUB, DERWENT, MEDLINE, BIOSIS

search terms: cancer, tumor, prognosis, expression, p27, p53BP2, etc.
